

Star Metal Shield

Nano-Technology Based Dust & Water Repellent coating for Metal & Ceramic.

Technical Data Sheet

Product type	: <i>Nano composite polymeric based transparent Super Hydrophobic coating for metal & ceramic surface</i>
Appearance	: Transparent liquid
Active ingredient	: Solvent based coating
Coating Thickness	: Approx 10-12 microns
Boiling Point	: 100°C.
Odor	: Mild
Vapour Pressure	: 18 mmHg @ 20°C
Vapour Density	: Not determined.
Specific Gravity	: Lighter than water.
Drying time	: Two hours
Coverage	: 300 - 350 sq.ft. / ltr (subjected to application method and substrate)
Best before	: 10 Months from the date of manufacturing
