

Star Water hield

Nano technology based transparent super hydrophobic coating for buildings

Technical Data Sheet

One should avoid application of coatings below dew point and above 50° temperatures.

Product type	: Nano technology based transparent super hydrophobic coating for buildings
Appearance	: Transparent liquid
Vapour Pressure	: 18 mmHg @ 20°C.
Boiling Point	: 100°C
Odor	: Mild
Vapour Density	: Not determined.
Specific Gravity	: Lighter than water
Application	: Spraying, Brush
Coverage	: 25-30 sqft/ltr in two coats
Best before	: 18 months from date of manufacturing
Drying time	: 48 hours
Storage	: Keep it in cool & dry place.
